

Call for Papers

International Journal of Applied Biomedical Engineering (IJABME)

This Issue going to submit the Scopus database in the year of 2020

The International Journal of Applied Biomedical Engineering (IJABME) announces a forthcoming this Issue that will be published on IJABME in June 2020.

The objective of this Issue is to discuss new theories and applications in these fields. The Issue solicits paper submission in Biomedical signal processing, Biomedical imaging and image processing, Bioinstrumentation, Bio-robotics and biomechanics, Biosensors and Biomaterials, Cardiovascular and respiratory systems engineering, Cellular and Tissue Engineering, Healthcare information systems, Human machine/computer interface, Medical device design, Neural and rehabilitation engineering, Technology commercialization, industry, education, and society, Telemedicine, Therapeutic and diagnostics systems, Recent advancements in biomedical engineering Field from, but not limit to, the people who presented their original works in the 2019 Biomedical Engineering International Conference (BMEiCON2019) which was held in Ubon Ratchathani, Thailand on November 19-22, 2019.

Authors are requested to extend the paper to at least 8 pages, and to prepare the manuscript as a portable document format (PDF) file. The paper length and format are shown on IJABME website at:

<http://www.ijabme.org/index.php/submission>

Please specify that the paper is submitted to “BMEiCON2019”.

Important dates:

Paper submission deadline: February 15, 2020

First notification: March 31, 2020

Final notification: April 30, 2020

Final manuscript deadline: May 16, 2020

This Issue Editorial Committee:

Chuchart Pintavirooj, KMITL, Thailand

Kazuhiko Hamamoto, Tokai University, Japan

Seiichi Suzuki, Seikai University, Japan

Kohji Masuda, Tokyo University of Agriculture and Technology, Japan

Suparerk Janjarasjitt, UBU, Thailand

Adisorn Leelasanthitham, MU, Thailand
